St Andrew's Church of England Primary School

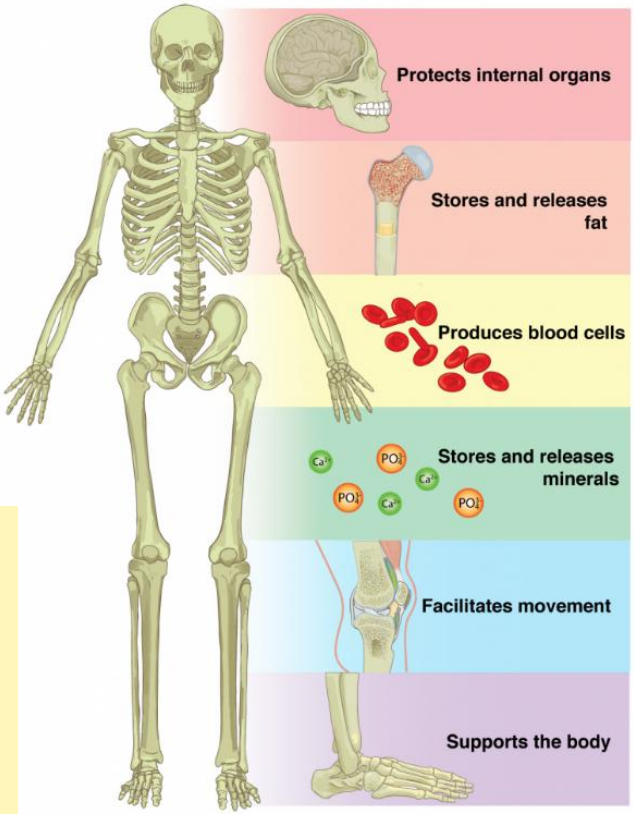

LKS2 Knowledge Organiser – Term 2 Science – Animals including humans.

Outcomes
Identify that animals need the right types and amounts of nutrition, and they get this from what they eat.
Identify that humans and some animals have skeletons and muscles for support, protection and movement.
Describe the simple functions of the basic parts of the digestive system in humans.
Identify the different types of teeth in humans and their simple functions.
Record findings using simple scientific language, drawings, labelled diagrams.

A healthy diet

The skeleton

Key vocabulary
photosynthesis: the process by which green plants use sunlight, carbon dioxide and water to make nutrients.
carnivore: an animal that eats only animals.
herbivore: an animal that eats only plants.
omnivore: an animal that eats plants and animals.
skeleton: an internal or external framework of bone, cartilage, or other rigid material supporting or containing the body of an animal.
muscle: fibrous tissue in a body that has the ability to contract, producing movement.
digestion: The process by which your body digests food, or your ability to digest food.
